

Are you curious about your child's behavior or development?

All children grow and change at different rates. A developmental screening can let you know if your child is on track.

The Ages & Stages Questionnaires (ASQ's) are quick and easy developmental screenings that are designed for children ages 0-5, to be completed by parents or primary caregivers. These questionnaires encourage parent-caregiver involvement, and helps you learn more about your child's development.

Each questionnaire can be completed in 10-20 minutes, and is divided into five areas: Communication, Gross Motor, Fine Motor, Problem Solving, and Personal-Social. The benefit for all children and families is so that parents know which areas they can focus on at home, with their children.

For more information, or to receive an age-appropriate ASQ for your child, please call First 5 Amador at 257-1092.
